Notes to the Financial Statements

for the year ended December 31, 2023

1. Corporate information

Castrol India Limited (the 'Company') is a public limited Company incorporated in India with its registered office at Technopolis Knowledge Park, Mahakali Caves Road, Chakala, Andheri (East), Mumbai–400 093. The equity shares of the Company are listed on two recognised stock exchanges in India. The Company is principally engaged in the business of manufacturing & marketing of automotive and industrial lubricants and related services.

2. Significant accounting policies

2.1. Basis of preparation

The Statement of Compliance with Indian Accounting Standards (Ind AS): The financial statements have been prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 ("the Act") and other relevant provisions of the Act and other accounting principles generally accepted in India.

Basis of measurement

These financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical Cost: Assets are recorded at the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire them at the time of their acquisition. Liabilities are recorded at the amount of proceeds received in exchange for the obligation, or in some circumstances (for example, income taxes), at the amounts of cash or cash equivalents expected to be paid to satisfy the liability in the normal course of business.

2.2. Use of estimates and judgements

The preparation of financial statements requires management to make judgments, estimates and assumptions in the application of accounting policies that affect the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Continuous evaluation is done on the estimation and judgments based on historical experience and other factors, including expectations of future events that are believed to be reasonable. Revisions to accounting estimates are recognised prospectively.

2.3. Critical accounting estimates, judgments and assumptions

A. Useful lives and residual values of property, plant and equipment

Property, plant and equipment represent a material portion of the Company's asset base. The periodic charge of depreciation is derived after estimating useful life of an asset and expected residual value at the end of its useful life. The useful lives and residual values of assets are estimated by the management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on various external and internal factors including historical experience, relative efficiency and operating costs and change in technology.

B. Income taxes

The Company's tax jurisdiction is India. Significant judgments are involved in determining the provision for income taxes including amounts to be recovered or paid for uncertain tax positions. Management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits.

C. Defined benefit obligations

Defined benefit obligations are measured at fair value for financial reporting purposes. Fair value determined by actuary is based on actuarial assumptions. Management judgement is required to determine such actuarial assumptions. Such assumptions are reviewed annually using the best information available with the Management.

D. Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Management judgment is required to determine the potential liabilities that are possible or remote but not probable of crystalizing or cannot be measured with sufficient reliability. Such liabilities are disclosed in the notes as contingent liabilities, unless the possibility of an outflow of resources embodying economic benefits is remote in Management's judgment.

Notes to the Financial Statements

for the year ended December 31, 2023

2.4. Recent accounting pronouncements

Standard issued that are not yet effective

Standards issued but not yet effective: In March 2023, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendment Rules, 2023, applicable to the Company for the financial year starting January 1, 2024 as stated below:

a. Ind AS 1 – Presentation of Financial Statements – the amendment prescribes disclosure of material accounting policies instead of significant accounting policies. The impact of the amendment on the Financial Statements is expected to be insignificant basis the preliminary evaluation.

b. Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors – the amendment added definition of accounting estimate and clarifies what is accounting estimate and treatment of change in the accounting estimate and accounting policy. There is no impact of the amendment on the Financial Statements basis the preliminary evaluation.

c. Ind AS 12 – Income taxes – the definition of deferred tax asset and deferred tax liability is amended to apply initial recognition exception on assets and liabilities that does not give rise to equal taxable and deductible temporary differences. There is no impact of the amendment on the Financial Statements basis the preliminary evaluation.

2.5. Summary of significant accounting policies

a. Current versus non-current classification

An asset is classified as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

b. Revenue recognition

Revenue

Revenue from contracts with customers is recognised on transfer of control of promised goods or services to a customer at an amount that reflects the consideration to which the Company is expected to be entitled to in exchange for those goods or services.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold, and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract. This variable consideration is estimated based on the expected value of outflow. Revenue (net of variable consideration) is recognised only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

Sale of products

Revenue from sale of products is recognized when the control on the goods have been transferred to the customer. The performance obligation in case of sale of product is satisfied at a point in time i.e., when the material is shipped to the customer or on delivery to the customer, as may be specified in the contract.

Income from services

Revenue from services is recognized over time by measuring progress towards satisfaction of performance obligation for the services rendered. The Company uses input method for measurement of revenue from services as it is directly linked to the expenses incurred by the Company.

Notes to the Financial Statements

for the year ended December 31, 2023

Interest income

Interest income is recorded using the Effective Interest Rate (EIR) for debt instruments carried at amortised cost. EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument to the gross carrying amount of the financial asset.

c. Foreign currencies

Functional currency

The functional currency of the Company is the Indian rupee. These financial statements are presented in Indian rupees (rounded off to Crores).

Transactions and balances

Foreign currency transactions are recorded in the functional currency by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. All foreign currency monetary assets and monetary liabilities as at the Balance Sheet date are translated into the functional currency at the applicable exchange rates prevailing on that date. All exchange differences arising on translation, are recognised in the Statement of Profit and Loss. Non-monetary assets and non-monetary liabilities denominated in foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of the transaction.

Gain or losses upon settlement of foreign currency transactions are recognized in the Statement of Profit and Loss for the period in which the transaction is settled.

d. Retirement and other employee benefits

Gratuity

The Company provides for gratuity, a defined benefit retirement plan ('the Gratuity Plan') covering eligible employees. The Gratuity Plan provides a lump-sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on respective employee's salary and tenure of employment with the Company.

Liabilities with regard to Gratuity Plan are determined by actuarial valuation, performed by an independent actuary, at each Balance Sheet date using projected unit credit method. The Company fully contributes all ascertained liabilities to the Castrol India Limited Employees' Gratuity Fund Trust ('the Trust'). Trustees administer contributions made to the Trusts and contributions are invested in insurance and deposit schemes.

The Company recognises the net obligation of a defined benefit plan in its Balance Sheet as an asset or liability. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows with reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. Net interest on the net defined benefit liability/(asset) is the change during the period in the net defined benefit liability/(asset) that arises from the passage of time.

The net interest cost is calculated applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in the employee benefit expenses in the Statement of Profit and Loss.

Gains and losses through remeasurements of the net defined benefit liability/(asset) are recognised immediately in balance sheet with corresponding debit or credit to other comprehensive income. The actual return of the portfolio of plan assets, in excess of the yields computed by applying the discount rate used to measure the defined benefit obligation is recognised in other comprehensive income. They are included in Retained Earnings in the Statement of Changes in Equity and in the Balance Sheet. Remeasurements of the net defined benefit liability/(asset) recognised in other comprehensive income are not reclassified to profit or loss in a subsequent period. The effect of any plan amendments is recognised in net profit in Statement of Profit and Loss.

Superannuation

Certain employees of the Company are participants in a defined contribution plan. The Company has no further obligations to the plan beyond its monthly contributions which are periodically contributed to the Castrol India Limited Staff Pension Fund, the corpus of which is invested with the Life Insurance Corporation of India and Bajaj Allianz Life Insurance Co. Ltd. The Company's contribution paid/payable during the year to Superannuation Fund is recognised in profit or loss.

Provident fund

Eligible employees of the Company receive benefits from a Provident fund, which is defined benefit plan. Both the eligible employees and the Company make monthly contributions to the provident fund equal to a specified percentage of the covered employee's salary. The Company contributes a portion to the Castrol India Limited

Notes to the Financial Statements

for the year ended December 31, 2023

Employees' Provident Fund Trust ('The PF trust'). The PF trust invests in specific designated instruments as permitted by Indian Law. The rate at which the annual interest is payable to the beneficiaries by the PF trust is being administrated by the Government. The Company has an obligation to make good the shortfall, if any, between the return from the investments of the PF trust and the notified interest rate. The Company's contribution paid/payable during the year to Provident fund is recognised in profit or loss.

Compensated absences

The Company has a policy on compensated absences which is applicable to its executives joined upto a specified period and all workers. The expected cost of accumulating compensated absences is determined by actuarial valuation performed by an independent actuary at each Balance Sheet date using projected unit credit method on the additional amount expected to be paid/availed as a result of the unused entitlement that has accumulated at the Balance Sheet date.

Termination benefits

Termination benefits, in the nature of voluntary retirement benefits or termination benefits arising from restructuring, are recognised in the Statement of Profit and Loss. The Company recognises termination benefits at the earlier of the following dates:

a) when the Company can no longer withdraw the offer of those benefits; or

b) when the Company recognises costs for a restructuring that is within the scope of Ind AS 37: Provisions, Contingent Liabilities and Contingent Assets and involves the payment of termination benefits.

Share-based compensation

Share value plan

BP PLC ("Ultimate Holding Company") has a "Share Value Plan" whereby the specified employees of its subsidiaries are granted restricted share units of Ultimate Holding Company. Each restricted share unit represents a conditional entitlement to receive one share of Ultimate Holding Company in future, provided that certain terms and conditions are met. The main terms and conditions are a) continuous employment with the BP group until the end of restricted period and b) achievement of certain performance targets by the employee and/or BP Group. The cost of equity-settled transactions with employees is measured by reference to the fair value of the equity instruments on the date on which they are granted and is recognised as an expense over the restricted period. A corresponding credit is recognised within equity since the cost of such share value plan is borne by the Ultimate Holding Company.

Restricted share unit and options

BP PLC ("Ultimate Holding Company") has a "One time reinvent plan" whereby all the employees of its subsidiaries are granted restricted share units of Ultimate Holding Company. Each restricted share unit represents a conditional entitlement to receive one share of Ultimate Holding Company in future, provided that certain terms and conditions are met. Each Option consist of a defined number of shares of ultimate holding Company (lot) at a fixed price with a condition entitlement to sell the lot of shares in future after the vesting period.

The main terms and conditions are a) continuous employment with the BP group until the end of vesting period and b) achievement of certain performance targets by the employee and/or BP Group. The cost of equity-settled transactions with employees is measured by reference to the fair value of the equity instruments on the date on which they are granted and is recognized as an expense over the vesting period. A corresponding credit is recognized within equity since the cost of such share value plan is borne by the Ultimate Holding Company.

Share match plan

The Ultimate Holding Company has a "Share Match Plan" whereby all executive employees of its subsidiaries have been given a right to purchase the shares of Ultimate Holding Company upto a specified amount. Every employee who opts for the scheme contributes by way of payroll deduction a specified amount towards purchase of share. The Company contributes equal amount and charges it to employee benefits expense.

Other employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the Statement of Profit and Loss of the year in which the related service is rendered.

Redundancy Expenses are fully charged to the Statement of Profit and Loss in the year in which they accrue.

Notes to the Financial Statements

for the year ended December 31, 2023

e. Taxes

Income tax expense comprises current income tax and deferred income tax. Income tax expense is recognised in the Statement of Profit and Loss except to the extent it relates to items recognised directly in equity, in which case it is recognised in other comprehensive income or other equity as the case may be.

Current income tax

Current tax is the amount of tax payable based on the taxable profit for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961. The current tax year for the Company being the year ending March 31, the provision for taxation for the year is aggregate of the provision made for the three months ended on March 31, 2023 and the provision for the remaining period of nine months ending on December 31, 2023. The provision for the remaining period of nine months has been arrived at by applying the applicable tax rate of the financial year 2023-24 to Profit Before Tax of the said period.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profits.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off tax assets against tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

f. Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises the purchase price, including import duties and non-refundable purchase taxes (Net of taxes credit wherever applicable) and any attributable cost of bringing the assets to its working condition for its intended use. Such cost also includes the cost of replacing part of the Property, plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of Property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the Property, plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in Statement of Profit and Loss as incurred.

Notes to the Financial Statements

for the year ended December 31, 2023

Depreciation on Property, plant and equipment is calculated on a straight-line basis, from the month of addition, using the estimated useful lives based on single shift, as specified in Schedule II to the Companies Act, 2013, except in respect of the following assets:

Assets description	Useful life as per management (as technically assessed)	Useful life under Schedule II
Residential and office buildings	5 years to 30 years	60 years
Plant and machinery	2 years to 21 years	15 years
Computers	3 years to 6 years	3 years
Equipment board with dealers*	3 years	10 years
Furniture and fixtures	2 years to 15 years	10 years
Motor vehicles	4 years to 10 years	8 years
Laboratory equipment	5 years to 21 years	10 years

*The Equipment board with dealers are derecognized at the end of the useful life of 3 years.

The residual values, useful lives and methods of depreciation of Property, plant and equipment are reviewed at the end of each reporting period and adjusted prospectively, if appropriate.

g. Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles are not capitalised and the related expenditure is reflected in Statement of Profit and Loss in the period in which the expenditure is incurred.

Intangible assets are amortised over the useful economic life i.e. 4-5 years based on management assessment and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets is recognised in the Statement of Profit and Loss.

h. Leases

The Company, at the inception of a contract, assesses whether a contract, is or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. A lessee recognises a right-of-use ("ROU") asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

Also, the Company has elected not to recognise right-of-use of assets and lease liabilities for short term leases that have a lease term of 12 months or less and leases of low value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

The right-of-use assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made.

A lease liability is remeasured, with a corresponding adjustment to the ROU asset, upon the occurrence of certain events such as a change in the lease term or a change in an index or rate used to determine lease payments.

Lease liabilities and ROU assets have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

Notes to the Financial Statements

for the year ended December 31, 2023

i. Inventories

Inventories consist of raw and packing materials, stock-in-trade and finished goods. Inventories are valued at lower of cost and net realisable value. Cost of inventories is determined on weighted average basis. Cost of manufactured finished goods and work-in-progress includes material cost determined on weighted average basis and also includes an appropriate portion of allocable overheads. Cost of traded goods includes cost of purchase and other cost incurred in bringing the inventories to the present location and condition. Due allowances are made in respect of slow moving, non-moving and obsolete inventories based on estimate made by management.

j. Impairment of non-financial assets

The carrying amount of assets are reviewed for impairment at the end of each reporting date if there is any indication of impairment based on internal/external factor. An impairment loss is recognised in the Statement of Profit and Loss wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's or cash generating unit's fair value less cost of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset. In determining fair value, recent market transactions are taken into account.

The business plans which are approved on an annual basis by senior management are the primary source of information for the determination of value in use. As an initial step in the preparation of these plans, various assumptions regarding market conditions, and cost inflation rates are set by senior management. These assumptions take account of existing prices and other macro economic factors and historical trends and variability.

Impairment losses including impairment on inventories are recognised in the Statement of Profit and Loss, except for previously revalued tangible assets, where the revaluation was taken to Revaluation Reserve. In this case, the impairment is also recognised in the Revaluation Reserve up to the amount of any previous revaluation.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life. A previously recognised impairment loss is increased or reversed depending on changes in circumstances. However, the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment. Such reversal is recognised in the Statement of Profit and Loss.

k. Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the Statement of Profit and Loss.

l. Financial instruments

a) Non-derivative financial instruments:

Initial recognition and measurement

All financial assets and liabilities are initially recognised at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Trade receivables that do not contain a significant financing component are measured at transaction price. Purchase and sale of financial assets are recognised using trade date accounting.

Subsequent measurement

Financial assets carried at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income (FVOCI)

A financial asset is measured at FVOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding and which are not held for trading.

Notes to the Financial Statements

for the year ended December 31, 2023

For equity instrument, the Company may make irrevocable election to present such investments at FVOCI. The Company makes such election on an instrument-by-instrument basis. Pursuant to such irrevocable option, changes in fair value are recognised in the OCI and is subsequently not reclassified to the Statement of Profit and Loss.

Financial assets at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

b) Derivative financial instruments

The Company enters into foreign exchange forward contracts to manage its foreign exchange rate risks.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in Statement of Profit and Loss immediately.

Derecognition of financial instruments

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in Statement of Profit and Loss if such gain or loss would have otherwise been recognised in Statement of Profit and Loss on disposal of that financial asset.

Financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate. The Company estimates cash flows by considering all contractual terms of the financial instrument through the expected life of that financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12 months expected credit losses. 12 months expected credit losses are portion of the lifetime expected credit losses and represent the lifetime cash shortfalls that will result if default occurs within the 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months.

Notes to the Financial Statements

for the year ended December 31, 2023

If the Company measured loss allowance for a financial instrument at lifetime expected credit loss model in the previous period, but determines at the end of a reporting period that the credit risk has not increased significantly since initial recognition due to improvement in credit quality as compared to the previous period, the Company again measures the loss allowance based on 12 months expected credit losses.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward looking information.

m. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand, investment in overnight funds and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. As part of the Company's cash management policy to meet short- term cash commitments, it parks its surplus funds in overnight funds that are held for a period of three months or less from the date of acquisition. These funds are open-ended debt funds that are readily convertible into known amounts of cash and are subject to insignificant risk of changes in value. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, as they are considered an integral part of the Company's cash management.

n. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares). For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

o. Cash dividend

The Company recognises a liability to make cash distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

p. Contingent liabilities

`

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements, unless the possibility of an outflow of resources embodying economic benefits is remote.

Particulars	Rupees in Crores
Less than one year	23.42
Between one and five years	67.30

24. Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM) of the Company. The CODM is responsible for allocating resources and assessing performance of the operating segments of the Company.

The Company has integrated its organization structure with respect to its automotive and non-automotive business considering that the synergies, risks and returns associated with business operations are not predominantly distinct. The Company has aligned its internal financial reporting system in line with the new organization structure. As a result the Company's reportable business segment consists of a single segment of "Lubricants" in terms of Ind AS 108. The Managing Director (Chief Operating Decision Maker) is accountable for leading the growth agenda for an integrated Automotive and Industrial business.

Notes to the Financial Statements

for the year ended December 31, 2023

25. (i) Contingent liabilities & commitments

Particulars	As at December 31, 2023 Rupees in Crores	As at December 31, 2022 Rupees in Crores
(a) Contingent liabilities [Refer note below]		
Claims against the Company not acknowledged as debts:		
- Income tax matters in dispute under appeal	5.54	10.57
- Sales tax matter under appeals	29.29	29.32
- In respect of compensation claimed by third parties / workers / employees	1.70	1.09
(A)	**36.53**	**40.98**
(b) Commitments		
- Estimated amount of contracts remaining to be executed on capital account and not provided for (net of advances)	64.09	68.68
(B)	**64.09**	**68.68**
Total (A+B)	**100.62**	**109.66**

Note:

The management based on internal assessment/external legal opinion does not expect these demands / claims to succeed. Claims, where the possibility of outflow of resources embodying economic benefits is remote, have not been considered in contingent liability.

25. (ii) The Company has received following demand orders from Maharashtra Sales Tax Department for disputes relating to the movement of goods from the Plant/ MWHs situated in Maharashtra to the CFAs for sale of goods made by the Company in the states other than Maharashtra, where applicable taxes have been paid as per the provisions of law. The department alleged that the movement of goods was to fulfil pre-existing orders in the destination States, and were therefore in the nature of inter-State sales. The Company contends that the movement of goods from Maharashtra was not pursuant to any contract /order from customers in other States hence the understanding of operations/ systems recorded in the assessment orders are not factually correct. The Company's tax payment methodology in respect of the goods sold is adequately supported by robust legal grounds/precedents and in Company's opinion the said demands are unjustified. Thus considering the favorable orders from MVAT Tribunal and based on the legal advice the Company has not made any provision in the books for the year ended December 31, 2023 and the possibility of outflow of resources embodying economic benefits is considered to be remote.

Rupees in Crores

Financial Year	Amount of demand (including interest)	Status
2007-08	306.71	The Company had received favourable orders from Maharashtra Sales Tax Tribunal (MSTT) against which the department filed appeals in Central Sales Tax Appellate Authority, Delhi (CSTAA). Hearing dates are awaited.
2009-10	255.50	
2010-11	263.63	
2011-12	474.64	
2012-13	578.05	
2013-14	485.22	
2014-15	528.34	
2015-16	510.69	The Company has received favourable order from MSTT.
2016-17	565.00	The Company has filed an appeal at MSTT.Hearing date is awaited.
2017-18 (Apr-17 to Jun-17)	163.47	The Company had received favourable order from MSTT against which department had filed the appeal in CSTAA. Hearing date is awaited.
Total	**4,131.25**	

Note: It is not practicable for the Company to estimate the timings of cash outflows, if any, in respect of the above pending resolution of the respective proceedings as it is determinable only on receipt of judgements/decisions pending with various forums/authorities.

Notes to the Financial Statements

for the year ended December 31, 2023

26. Details of dues to micro enterprises and small enterprises as defined under The Micro, Small and Medium Enterprises Development (MSMED) Act 2006*#

Particulars		As at December 31, 2023 Rupees in Crores	As at December 31, 2022 Rupees in Crores
a.	The principal amount and the interest due thereon remaining unpaid to any supplier as at the end of each accounting year		
	- Principal amount due to micro and small enterprises	1.54	1.18
	- Interest due on above	0.03	0.20
b.	The amount of interest paid by the buyer in terms of section 16 of the Micro and Small Enterprise Development Act, 2006, along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year.	-	-
c.	The amount of interest due and payable for the period of delay in making payment (which have been paid but beyond the appointed day during the year) but without adding the interest specified under Micro and Small Enterprise Development Act, 2006.	-	-
d.	The amount of interest accrued and remaining unpaid at the end of each accounting year	0.03	0.20
e.	The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues as above are actually paid to the small enterprise for the purpose of disallowance as a deductible expenditure under section 23 of Micro and Small Enterprise Development Act, 2006.	-	-

*The Company has initiated the process of identification of suppliers registered under Micro, Small and Medium Enterprises Development Act, 2006, by obtaining confirmations from all suppliers. Information has been collated only to the extent of information received.

#The Company had awarded certain works contracts to vendors who are registered under the Micro, Small and Medium Enterprises Development Act, 2006. Since, the scope of the said Act does not effectively extend to works contract, the payment and the reporting obligations thereunder would also not apply to such retention monies and hence the same has been accordingly reported.

27. Employee Benefits

I) Defined Contribution Plan

Contribution to Provident and Other Funds' in Note 18 includes Rs. 0.85 Crores (December 31, 2022: Rs. 0.90 Crores) for ESIC and Labour Welfare Fund. Note 21 includes Insurance Rs. 3.07 Crores (December 31, 2022: Rs. 3.68 Crores) for Medical Insurance benefits and post retiral medical benefit scheme. Salaries, wages and bonus in Note 18 includes Rs. 1.49 Crores for share match (December 31, 2022: Rs. 1.33 Crores).

II) Defined Benefit Plan

A) General Description of Defined Benefit Plan

i) Gratuity

The Company operates gratuity plan wherein every employee is entitled to the benefit equivalent to fifteen days/one month salary last drawn for each completed year of service depending on the date of joining. The same is payable on termination of service, retirement or death, whichever is earlier. The benefit vests after five years of continuous service.

The Company has a defined benefit gratuity plan in India (funded). The Company defined benefit gratuity plan is a final salary plan for India employees, which requires contributions to be made to a separately administered fund.

Notes to the Financial Statements

for the year ended December 31, 2023

27. Employee Benefits *(Contd.)*

The gratuity plan is governed by the Payment of Gratuity Act, 1972. Under the act, employee who has completed five years of service is entitled to specific benefit. The level of benefits provided depends on the member's length of service and salary at retirement age. The fund has the form of a trust and it is governed by the Board of Trustees, which consists of an equal number of employer and employee representatives. The Board of Trustees is responsible for the administration of the plan assets and for the definition of the investment strategy.

ii) Provident Fund

The Provident Fund (administered by a trust) is a defined benefit scheme whereby the Company deposits amounts determined as a fixed percentage of basic pay to the fund every month. The actuary has provided a valuation and determined the fund assets and obligations as at December 31, 2023. Further, it has been determined that the yield on the investments of the trust is adequate to meet the obligation towards the payment of the interest rate notified by the government.

iii) Pension Benefit to Past Employees

Under the Company's pension scheme, certain categories of employees, on retirement, are eligible for monthly differential pension which is accounted for on an actuarial basis as on the Balance Sheet date.

iv) Compensated absences

The Company has a policy on compensated absences which is applicable to its executives jointed upto a specified period and all workers. The expected cost of accumulating compensated absences is determined by actuarial valuation performed by an independent actuary at each Balance Sheet date using projected unit credit method on the additional amount expected to be paid as a result of the unused entitlement that has accumulated at the Balance Sheet date.

B) The plans in India typically expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk	The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to government bond yields; if the return on plan asset is below this rate, it will create a plan deficit. Currently the plan has a relatively balanced investment in equity securities and debt instruments.
Interest risk	A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.
Longevity risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary risk	The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Notes to the Financial Statements

for the year ended December 31, 2023

27. Employee Benefits *(Contd.)*

C) Amounts recognized in financial statements respect of these defined benefit plans are as follows:

27. Employee Benefits *(Contd.)*

d) Major Categories of Plan assets are as follows

Provident fund — **Rupees in Crores**

Particulars	As at December 31, 2023	As at December 31, 2022
The composition of plan assets		
Special Deposit	17.32	17.32
Investment in Government and Debt Securities	201.41	193.75
Investment in Mutual Funds	11.95	9.74
Bank Balance	13.25	2.12
Other receivables	8.50	6.82
Total	**252.43**	**229.75**

Gratuity — **Rupees in Crores**

Particulars	As at December 31, 2023	As at December 31, 2022
The composition of plan assets		
Special Deposits	0.76	0.76
Deposit with insurance schemes	35.56	35.33
Bank Balance	2.94	0.36
Others - Receivables / (Payables)	1.44	0.76
Total	**40.70**	**37.21**

Each year, the Board of Trustees reviews the level of funding in the India gratuity plan. Such a review includes the asset-liability matching strategy and investment risk management policy. This includes employing the use of annuities and longevity swaps to manage the risks. The fair values of the above investments are determined based on prices in active markets. The Board of Trustees decides its contribution based on the results of this annual review. Generally, it aims to have a portfolio mix of equity instruments and debt instruments. The Board of Trustees aim to keep annual contributions relatively stable at a level such that no plan deficits (based on valuation performed) will arise.

e) The significant assumptions used to determine benefit obligations as at December 31, 2023 and December 31, 2022 are set out below:

Particulars	As at December 31, 2023			As at December 31, 2022		
	Gratuity (Funded)	Compensated absences (Non-funded)	Provident Fund (Funded)	Gratuity (Funded)	Compensated absences (Non-funded)	Provident Fund (Funded)
Discount rate	7.27%	7.27%	7.27%	7.38%	7.38%	7.38%
Rate of increase in compensation level	Executives - 10.00% Workers - 4%	Executives - 10.00% Workers - 4%	Executives - 10.00% Workers - 4%	Executives - 10.0% Workers - 4%	Executives - 10.0% Workers - 4%	Executives - 10.0% Workers - 4%

b) Decrease by 100 basis points	55.80	1.27	-	55.07	1.14	-
Interest Rate Guarantee						
a) Increase by 100 basis points	-	-	259.26	-	-	234.33
b) Decrease by 100 basis points	-	-	249.03	-	-	228.29

The sensitivity analyses above have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the year and may not be representative of the actual change. It is based on a change in the key assumption while holding all other assumptions constant. When calculating the sensitivity to the assumption, the same method used to calculate the liability recognized in the Balance Sheet has been applied. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared with the previous year.
